Profile Summary

Kyushu University Graduate School of Systems Information Science^a «^a fM.S.Ł“†ŋ åååfä^a Łå Ł“ : Ch

Core Skills

Łå Ł“ Ł %å

| Łå Ł“ | ^a <^a a « | æ>å å'çå |

|-----|-----|-----|

| Chinese | Native | â |

| Japanese | JLPT N2 | â |

| English | TOEIC 750 | â |

Professional / Research Experience

1. Edge-device Object Recognition Optimization

Ø å : Computer Vision / Edge AI

æØ : 2023-07 to 2024-04

Deploy object recognition on edge devices with limited compute resources while maintaining recog

äi Ø ç ææ:

â¢ model_size_reduction: â %

â¢ latency: â ms

2. Lightweight Visual Backbone Research

Ø å : Computer Vision / Lightweight Models

æØ : 2022-09 to 2024-06

Improve lightweight computer vision backbones while balancing accuracy, efficiency, and deployab

äi Ø ç ææ:

â¢ publications: â 1 paper

3. YOLOv5 Detection Latency Reduction for Lightweight Robots

Ø å : Object Detection / Real-time Inference

æØ : 2022-09 to 2024-06

Reduce detection latency in YOLOv5 to prevent real-time tracking failures in lightweight robotic

äi Ø ç ææ:

â¢ publications: â 1 paper

This document was auto-generated from candidate profile data.

Human review and editing required before submission.

Safety Boundary

Do not submit by default.

Stop before final submission.

Explicit human approval is required before any submit action.
